INTRODUCTION
These brand guidelines are designed to ensure recognition of the McMaster University brand and consistency of its message.

Who should use these guidelines?
Anyone at McMaster who communicates on the University’s behalf can refer to these guidelines when creating any digital communications or web pages.

FOR FULL PRINT BRAND GUIDELINES AND CONCEPTUAL DIRECTION, ALWAYS CONSULT THE McMaster BRAND STANDARDS MANUAL.
RESPONSIVE DESIGN

2.0
Responsive design | Breakpoint overview

All McMaster websites need to have fully responsive design across device breakpoints, ranging from standard desktop to smartphone dimensions. The default grid system is built in Foundation with 12 columns and fluid expandable containers. See below for general guidelines.

### Grid system

<table>
<thead>
<tr>
<th>Screen format</th>
<th>Viewport width range</th>

**1200px - Visual area 1140px**

**Grid structure – Mobile**

![Mobile Grid Structure](image)

**640px - Visual area 620px**
Colour palette | McMaster Heritage Colours

Strengthen the McMaster brand by consistently using the McMaster colour palette across all digital communications. The rich hues suggest tradition and solidity. These colours are all reflected in the McMaster logo, an essential element of our brand identity. McMaster Heritage Maroon is a key brand colour. Continue to use this Heritage colour for all digital applications where appropriate. The Brighter World colours are to be used in all brand communications in addition to the Heritage colours.

**HERITAGE COLOURS**

Used in association with all McMaster materials.

- **McMASTER HERITAGE MAROON**
  - HEX 7A003C

- **McMASTER HERITAGE GOLD**
  - HEX FDBF57

- **McMASTER HERITAGE GREY**
  - HEX 5E6A71

**TINTS**

A tint is a screened (lighter) version of a colour. Tints of the McMaster Heritage colours are allowed only in tables and charts when information should be separated to increase the legibility or provide hierarchy of information. Keep in mind that for web and other digital applications, all colour combinations have to pass AA standards from W3C.

**IMPORTANT**

The colours below are only to be used on web and other digital applications. For any other uses, please see the McMaster Brand Standards Manual.
### Colour palette | Brighter World Colours

The Brighter World brand colours blend well with McMaster Maroon and Gold and provide a broadened range of colour options that renew McMaster’s image in a youthful way. This palette is intentionally vibrant and these hues complement each other and the Heritage Colour palette, reflecting the “Brighter World” brand story (see the McMaster Brand Standards Manual) and spirit of collaboration at the university.

#### Brighter World yellow
- **Hex** #FFD100

#### Brighter World lime
- **Hex** #D2D755

#### Brighter World sky blue
- **Hex** #8B03E6

#### Brighter World red
- **Hex** #A6192E

#### Brighter World green
- **Hex** #007B4B

#### Brighter World blue
- **Hex** #007096

#### Cool grey
- **Hex** #DBDBDD

#### Neutral support

**HIGHLIGHTS**
Used for highlights and backgrounds in the duotone images.

**Darker tones**
Used only to contrast the highlights in the duotone images.

The Darker Tones palette is intended to add contrast where a darker colour is necessary to retain clarity of detail in a photograph. Because of its strong impact, use the darker red judiciously.

**HIGHLIGHTS**

- Brighter World yellow: Hex #FFD100
- Brighter World lime: Hex #D2D755
- Brighter World sky blue: Hex #8B03E6

**DARKER TONES**

- Brighter World red: Hex #A6192E
- Brighter World green: Hex #007B4B
- Brighter World blue: Hex #007096

**Cool grey**
- Hex #DBDBDD

**Neutral support**
- Hex #FFD100
- Hex #D2D755
- Hex #8B03E6
- Hex #A6192E
- Hex #007B4B
- Hex #007096
- Hex #DBDBDD
Typography | Primary typeface

For all digital applications, the Roboto web font set replaces the original Univers print font set. Roboto web font is a sans serif typeface with a clean, modern look.

Univers

*Use for print materials only.*

Roboto

The entire font family can be used for digital applications.

By using a web font we ensure that the typeface will be displayed consistently across all devices.

**DO:**
Use Roboto for web and other digital applications.

**DO NOT:**
Use Roboto for print materials.

For more information about print guidelines, please see the McMaster Brand Standards Manual.
Typography | Headings

These are the font styles available for headlines and subheads when designing a new webpage.

**H1**

Used on hero banners and main page headers.
*Font*: Roboto Condensed Regular 50/55
*Colour*: #5E6A71

**H2**

Used on section titles for subheads, in sentence case or all caps.
*Font*: Roboto Condensed Regular 28/34
*Colour*: #5E6A71

**H3**

Used on form titles.
*Font*: Roboto Condensed Regular 20/24
*Colour*: #5E6A71

**H4**

Used for subheads and for dates on posts.
*Font*: Roboto Black 13/16
*Colour*: #5E6A71
**Typography | Body copy**

These are the Roboto font styles available for body copy. This type weight is preferred for regular body copy because it creates a more sophisticated look and contrasts well with other elements on the page.

---

**Body copy**

**Quote**

Font: Roboto Regular 28/30  
Colour: 7A003C

"STATISTIC OR FACTOID ABOUT MCMASTER AND RESEARCH AREA"

**Legal copy**

Font: Roboto Condensed Regular - 13/16  
Colour: 525C85

At McMaster, we measure our success by the degree to which we improve people’s lives, contribute to our global knowledge base and advance the societies in which we live. Learn about the groundbreaking research taking place at McMaster.
Iconography | McMaster

Icons are used to represent McMaster services, subjects and way-finding tools simply and visually. These icons are pared down to their simplest form for a contemporary look, and for maximum clarity.

When creating new icons, keep in mind that, in some cases, we also need to consider interaction states, such as hover, clickable and disabled. As a reference, always use the icon examples below, created for the McMaster.ca homepage.
Iconography | Construction

When creating new icons, it’s important to use the same visual treatment as existing icons. Use the same colour schemes and line properties, so that even if icons change size, they keep a similar look.

ON WHITE

ON MAROON

Modals | Overview

A modal dialog is an effective tool for directing a web user’s attention toward important information. They are designed to interrupt the user to inform them or demand an action. See below for examples and guidelines.

*The default copy layout is left align
Media | Video

When creating videos representing McMaster, use the After Effects working files provided for the intro and outro in order to maintain brand consistency and ensure identification of the McMaster identity.

Variations

Use either a short introduction featuring only the logo, or animation that also brings in a title treatment.

When to use these animations

These can be used to introduce or close video profiles of researchers, department tours, student interviews, or other short video subjects.

Where to use these videos

These intro and outro animations are ideal for McMaster videos to be shared on YouTube, Facebook, Instagram, or other social media.
Heroes | Treatment

Here are some examples of hero image treatments to use for reference and inspiration when creating or updating web pages.

**Overlay treatment**

Overlay

Photography or video

**OVERLAY EFFECTS SETTING**

Please refer to the Brand Standards Manual
- “Image Style | Creating duotones using Photoshop, method” Page 41
- “Image Style | Creating “fake”duotones using Adobe InDesign.” Page 42

**Non overlay treatment**

Use the working files provided for the intro and outro in order to maintain brand consistency and ensure identification of the McMaster identity.
News & Events | Treatments

See guidelines below for the treatment of news story teasers, and external link symbols, for the Brighter World website.

**News treatments - Brighter World**

- Size 45px
**Loading | Overview**

Progress indicators, or load spinners, let website users know that progress is being made on the action they’ve taken, such as a download. Text can help provide further clarity about what’s happening. See guidelines below.

### LOAD SPINNERS

Load spinners should be used when there is an indeterminate amount of time/progress related to a process (e.g., downloading data).

### LOADING BUTTON WITH TEXT

For buttons with text, the load spinner can appear where the icon would appear. The text may change to reflect the current state.
Navigation | Faculty (Tier 1)

The main navigation is a key feature of your website. It provides the guideposts visitors need to navigate your site and needs to be as clear and accessible as possible. This is the main header for your website (The Faculty of Engineering example is provided for reference only.), so it's important to strictly adhere to the guidelines below for placement of elements, font and logo size, brand colours, and other design features.

**HEADER WITH FACULTY NAME (TIER 1)**

- **McMaster University Logo**: Left-align. Maximum width size 140px
- **Background Colour**: White. HEX FFFFFF
- **Faculty Name**: McMaster University
- **Title**: McMaster Faculty of Engineering
- **Navigation Level 01**: Right-align. Maximum width size 55px
- **Select Field**: Minimum px separation between elements 70px
- **Search and Menu**: Arrow width 20px

**Fonts**

- **H1 Title**: 40px Roboto Condensed Bold. Sentence case. Tracking -20px. HEX 7A003C
- **Navigation Level 01**: 17px Roboto Condensed Bold. Upper case. Tracking 20px. HEX FFFFFF
- **Search and Menu**: Right-align. Maximum width size 55px. Minimum px separation between elements 70px

**Background Colour**

- **McMaster Heritage Maroon**: HEX 7A003C

**Search and Menu**

- **Search**: HEX FFFFFF
- **Menu**: HEX 7A003C
Global and site header | Department (Tier 1) | Faculty (Tier 1)

This header is used for the departmental pages of the website, so follow these guidelines to maintain consistency with the rest of the site. See below for placement of elements, font and logo size, brand colours, and other design features.
Global and site header | Approved logos and marks

Below is an example of a website header that includes a faculty logo. Follow these guidelines closely to ensure consistency with the McMaster brand.
Global and site header | Navigation

For clarity and ease of reading, the elements of the navigation menus must consistently follow the guidelines for sizing, spacing, formatting and colours outlined below.

Global Footer | Overview

A footer is a key element of your website, a tool for visitors to further navigate the site or find your contact information. It's important for this element to be as clear and easy to scan as possible, see guidelines below.
Site Footer | Departments

Below, see guidelines and examples to use for departmental or faculty site footers. These departmental and site footers must always be anchored by the global footer.
Voice and tone

McMaster University speaks with a consistent voice across all print and digital communications — from websites to e-newsletters to advertising. This voice is the embodiment of McMaster’s distinct identity, as expressed in Patrick Deane’s “Forward with Integrity” letter, combined with the Brighter World vision and University Purpose Statement. Our tone, however, may vary depending on the audience. For example, a more conversational tone is used for social media; vivid adjectives and verbs for promotional copy; a direct, straightforward tone for web copy; and a more formal tone for official documents.

Voice elements

Smart and purposeful, but never condescending: Speak from a place of knowledge and authority, yet remain open to new ideas and new ways of thinking or approaching a situation. Inform rather than dictate.

Optimistic
Focus on solutions more than problems. Frame subjects from a positive perspective rather than a negative one.

Direct
Get to the point. Avoid unnecessary wordiness or hyperbole.

Team-focused
Where possible, put individual accomplishments in the context of a team effort. Avoid a “hero worship” approach and, instead, acknowledge the efforts of the group, community or faculty that helped make the accomplishment possible.

Clear and straightforward
Avoid jargon or wordiness. The most concise wording is often the most powerful.

Warm and student-focused
Use first- and second-person language ("we," “you,” “us”) and contractions when appropriate.

Impact-focused
When sharing specific McMaster research stories, where applicable, make reference to the impact, or potential impact, of the work in contributing to a better world.
Writing for the web

The way users read on a screen is different from the way they read printed pages. Users generally scan the page until they find information that interests them, and then they read further.

When writing web pages, emails, e-newsletters, or other digital communications, please follow these best practices:

**Be brief:**
Put the most important information up front, and keep paragraphs and sentences short and to the point.

**Be scannable:**
Break up large chunks of text with informative subheads, bolded keywords and bulleted lists, where appropriate.

**Be relevant:**
Focus on the user’s needs, and try to anticipate what they need to know.

**Be helpful:**
Try to include a “call to action” on each page, or a clear guide to the next logical step users can take.
SOCIAL MEDIA
Social media | Overview

Social media has become an integral part of today’s communications and these guidelines will help ensure all social media sharing on behalf of McMaster will maintain consistency for our brand, values and mission. Use these guidelines when creating posts or assets for social media.

LANGUAGE:

The same writing guidelines for digital apply to social media.

Make sure you are authentic. Remember to represent yourself and the institution accurately and be transparent about your role in the institution.

You are using a channel provided by McMaster University, therefore conversations should be respectful and bring value to users.

ENGAGEMENT:

You are representing the institution, so avoid confrontations online and make sure to manage any issues accordingly.

Be careful when engaging with users, be respectful to others, and know the right moment to intervene. Opposing opinions are common and discussions may happen, but do not engage in arguments that may bring harm to the institution’s image.

Mediate discussions with responsibility and do not tolerate disrespect, acting at the right moment to diffuse any situation.

PROTECT INTELLECTUAL PROPERTY:

Before posting anything, confirm if you own the rights of the pieces posted. From a photo to a quote, be sure that you own the right to share it, respecting copyrights, trademarks and other legal rights.

CHANNEL GUIDELINES:

It’s important to check each social media channel’s requirements for posting on a regular basis, as they change frequently.
Social media | Logos and avatars -- Square

See below for guidelines on using the McMaster University logo in profile pictures or as a social media avatar. (For full logo and mark guidelines, see the McMaster Brand Standards Manual.)

**IMPORTANT:**
Small logo usage is explained in detail in the McMaster Brand Standards Manual, however due to the nature of responsive design and social media platforms, we need to consider some unique cases that are listed here. These are the smallest possible use scenarios and are only allowed in digital platforms. For the same reason, measurements are written in pixels and should not be replicated in print.
Social media | Logos and avatars -- Circle

Instagram and Twitter have introduced round images as profile avatar formats. Please follow these guidelines when creating circular avatar images.

DIMENSIONS
Height: 180px
Width: 180px
= standard Instagram & Twitter profile picture
Social media | Logos and avatars -- The shield

The McMaster shield can be used alone ONLY on McMaster University profiles, because it will always be paired with the full name of the institution beside it. This should never be done for any faculty of department profiles. It is important to remember that a profile picture should help users identify the profile owner and the department it is representing. For those cases, always use the lockup with the complete logo design.

**DIMENSIONS**
- **Height:** 180px
- **Width:** 180px

**DO:**
Always use the lockup with the complete logo version.

**DO NOT:**
- Use the single shield on any faculty or department social media profile.
- Always use the lockup with the complete logo version.
Social media | Snapchat and Instagram videos

Here are some considerations when managing a profile and posting videos on Snapchat and Instagram.

1. **Shoot vertically** – This saves user from having to keep rotating their phone to watch a story.

2. **Start by introducing yourself** – Name, event, position.

3. **Mention why are you taking over the account.**

4. **For videos and interviews** – Either create a slide to first tell viewers to turn audio on, or add the speaker emoji to indicate audio is being used.

5. **Be mindful of where you place text.**

6. **Carefully consider text colour.**

7. **Emojis should add to story, not distract from it.**

8. **Make the end of obvious.** Example: “Thank you for watching Marauders!”

9. **Do not open snaps from followers in the chat section.**

10. **When you are done, save story to Memories.**
Social media | Post length

Here are some considerations when creating a social media post. Regulations for maximum possible characters can change often, please consult the requirements for each platform before posting.

FACEBOOK:
Short is sweet on Facebook. Opinions vary on the specific length, but generally, copy should be less than 80 characters. Keep videos to under two minutes. Use hashtags, where appropriate.

INSTAGRAM:
Since it is primarily a visual platform, text should be kept to the minimum on an Instagram post. Only add hashtags (to a recommended maximum of five) if they’ll be useful in getting your message to a certain audience.

LINKEDIN:
Try to limit yourself to about 25 words. Make sure to include a URL that sends users to a place where they can get more information about your post’s topic.

SNAPCHAT:
Snapchat is another visual channel. If you select the text bar after taking a snap, it will give you space for one line of copy.

TWITTER:
The current limit for tweets is 280 characters, but try to stay under 200 for maximum effect. Twitter is currently testing 280-character tweets with a small group of users. You can include photos, GIFs, or videos in each post.
Accessibility

McMaster University is committed to advancing the culture of accessibility, equity and human rights. The Equity and Inclusion Office works with campus and community partners to promote, develop and support equity, diversity and inclusion initiatives. For more information, please visit: http://equity.mcmaster.ca/about-us

McMaster University strives to create an inclusive community for all. How information is presented, and the technologies that are used to share information, greatly shape a person’s experience. Promoting a communications infrastructure that takes the needs of persons with disabilities into account is a priority for McMaster and a priority in our goal to create a Brighter World.

The McMaster Brand Guidelines have been created with accessibility in mind to foster a clear and consistent information-scape across campus. For more information on accessibility at McMaster, please visit: http://accessibility.mcmaster.ca.
Accessibility | Digital

Digital accessibility standards are a requirement in Canada. These standards were created to ensure that all users can navigate online without limitations, and can access the same level of information.

The standard used in Canada for accessibility is known as Web Content Accessibility Guidelines (WCAG) 2.0.
You can find the guidelines at https://www.w3.org/WAI/guid-tech.html

It’s important to remember that all McMaster websites have to follow Level AA standards of accessibility.
Here is a short list of important things to consider when creating a new design.

Keyboard navigation
The navigation through keyboard is very important. Some users use keyboards to navigate online and it’s an important consideration while organizing links and elements on a page.

Contrast
All elements should have enough contrast. That is achieved by using appropriate colour combinations and minimum sizes for fonts.
You can use this tool to test colours and font sizes https://contrastchecker.com

Alt-text
Remember that all images and videos should have alt-text, so screen readers can describe what is being displayed on screen appropriately.

Closed captioning (CC)
Hearing-impaired users rely on CC to understand videos with audio.

Full requirements
To ensure you fully comply with Ontario government website accessibility requirements, visit https://www.ontario.ca/page/how-make-websites-accessible
